01 PROFILE

> I connect customer experience with the operational systems behind it. Across marketplace, mobile, and enterprise products, I translate user needs, business rules, and technical constraints into clear flows and interfaces. My practice spans research, interaction and visual design, and engineering handoff, with 10+ years in digital design. I am extending that practice through system analysis and AI-assisted specification and design work.

02 SELECTED PRODUCT WORK

Q-CHANG · Customer and service-provider experience

Home-service marketplace | Senior UX/UI · CX Strategy | 02/2022-04/2023

- Worked across customer, technician, and operations journeys, connecting service discovery and booking with the work required to fulfil a request.
- Designed homepage information architecture, service grouping, trust UI, and booking entry points; worked on mobile job-selection and acceptance flows for service providers.
- Mapped appointment changes against technician availability and cross-team handoffs, designing service blueprints and scheduling flows to address unclear responsibilities.

WCF Digital · Complex workflows made understandable

Government service | UX/UI Design | 2025-2026

- Delivered a medical-supply entry redesign that went live, addressing legacy limitations that required staff to record some items outside the system. Organized supplies into 3 categories with multi-item selection, per-item quantities, and a single save action.
- During training and UAT, observed users understanding the revised flow and completing the required entry tasks.

Smart Asset · Design with technical context

Asset rental operations | UX × SA Intern | 07/2026-10/2026

- Drafted initial specifications and contributed to UX/UI design alongside a software engineer, using AI to support specification and design work.
- Used the proposal-to-return lifecycle, data rules, and operational states to frame what screens needed to support and communicate.

03 DESIGN PRACTICE

Research & framing: User journeys, requirements, service blueprints, workflow mapping.

Interaction & UI: Information architecture, task flows, interface hierarchy, prototyping.

Collaboration: Cross-functional review, engineering handoff, junior mentoring.

04 EXPERIENCE

07/2026-10/2026

Code(Hard) · UX × SA Intern

- Extending product design practice through system analysis, technical constraints, and AI-assisted specification and UX/UI work for Smart Asset.

06/2024-05/2026
Contract

Depthfirst Co., Ltd. · Senior UX / Product Designer

- Provided UX/UI designs for WCF medical-supply entry that were implemented in the live system, and observed users during training and UAT. Contributed to journey continuity and shared UI standards for SSO Core.

05/2023-12/2023
Full-time

Code(Hard) · UX Systems Consultant

- Connected requirements, task maps, client reviews, proof of concept, testing, and implementation handoff across Mobile POS, freight quotations, and web projects.

02/2022-04/2023
Full-time

Q-CHANG · Senior UX/UI · CX Strategy

- Designed across customer booking, technician workflows, and operational handoffs in a home-service marketplace.

08/2020-12/2021
Full-time

Wedev · Senior UX/UI Designer

- Worked with product teams in Agile delivery, mentored junior designers, and contributed to operational dashboards.

05/2019-07/2020

Benchachinda Group · Senior UX/UI Designer

- Created GIS asset views and field-technician interfaces for MaxiTask, supporting telecom network operations across Thailand, Myanmar, and Laos.

02/2018-05/2019

ClickNext · UX/UI Designer

- Structured finance, trading, reporting, and registration workflows for MY EXIM, InterGOLD, Oil Reserve Reporting System, and ASEAN Summit 2019.

02/2015-01/2018

Digitech 4.0 / iBusiness Corp. · Web Designer

- Translated requirements and user flows into web interfaces and development handoff materials, refining designs through feedback.

05 TOOLS & EDUCATION

Tools: Figma · Framer · Adobe · Notion · Jira · Codex
Education: Bachelor of Art and Design, Visual Communication Design · Rangsit University · 2014
Languages: Thai - Native · English - Working proficiency
